

Practice Task - 1

In-Depth Exploration of MongoDB Queries

1. Find all documents in the collection where the **age is greater than 30**, and only return the **name** and **email** fields.
2. Find documents where the favorite color is either **"Maroon"** or **"Blue."**
3. Find all documents where the skill is an **empty array**.
4. Find documents where the person has skills in both **"JavaScript"** and **"Java."**
5. Add a new skill to the skills array for the document with the email **"amccurry3@cnet.com"**. The skill is

`{"name": "Python", "level": "Beginner", "isLearning": true}`

Note: At first, you will have to insert the given email then add the skill mentioned above

6. Add a new language **"Spanish"** to the list of languages spoken by the person.
7. Remove the skill with the name **"Kotlin"** from the skills array.
